STUDENT MATERIALS
READING CONTEST 219

Spring Break is 56 days away and the principal at Small City Elementary School wants the fifth graders to increase the number of pages they read every day from now until Spring break. Right now, the fifth graders read a total of 2,587 pages each day. Help the principal complete the rewards chart that would encourage fifth graders to read more.

Fill in the four missing pieces of the reward chart to show the total number of pages that must be read to earn the rewards as well as your best idea for the ultimate prize. Then, you will use your persuasive and mathematical skills to convince the fifth graders to work hard and earn the ultimate prize. If the students do not increase how many pages they are reading, how many pages will they read before spring break?

2,587 x 56 = 29,477

Fifth Grade Reading Rewards	
Total Number of Pages Read by Spring Break (pages per day x days until spring break)	Rewards
2,807 x 56 = <u>31,087</u>	15 minutes of extra recess
3,153 x 56 = <u>34,683</u>	Ice cream party
3,429 x 56 = <u>36,721</u>	Ultimate prize <u>anybody of my choice</u>

Use your persuasive skills on the lines below to convince students to read enough to earn the ultimate prize. Be sure to use mathematical reasoning to support your ideas.

So think about it you can go outside for the whole day or day I pick and no homework for that day and the rest of the month
ANY body on ANY day to go outside and NO homework That day and for the rest of the month
and what for reading 3-2 hours a day.
Let Me say it again A whole 8 hours with you and your BOYS (or girls) and do whatever you want (play basket ball) for reading 2-3 hours a day its easy plus ice cream and 15 minutes of extra recess but still A whole day!
