

**STUDENT MATERIALS**  
**FIELD DAY FRENZY QUESTIONS**

Your school is holding a field day to celebrate the end of the school year. As Class President, part of your responsibility is to help with the planning.

**Task 1: Chaperone Conundrum**

Your middle school has a total of 576 students in the school. Parent chaperones will be needed to take groups of students. The principal has decided that the perfect size group would be 18 students in each group. Using the long division algorithm, figure out how many chaperones the school needs for groups of 18 students. You must show all your work in the algorithm and be sure to include the answer.

$$\begin{array}{r} 032 \\ 18 \overline{) 576} \\ \underline{54} \phantom{0} \\ 36 \\ \underline{36} \\ 0 \end{array}$$

$$\begin{array}{r} 2 \\ 18 \\ \times 3 \\ \hline 54 \end{array}$$

32 Chaperones are needed

### Task 2: Time Management

Now that you have figured out how many chaperones are needed, you will need to find the volunteers. You've been given the first three class periods of school to create a Sign-Up Genius for parents to sign-up for volunteering. Each class period is 60 minutes long, so you have been given 180 minutes to complete this website. If it takes an average of 8 minutes to create just one volunteer slot on the website, would three class periods be long enough?

Using long division, figure out if you have been given enough time to ensure the site is ready to launch. If not, how long will you need?

Be sure to show all steps of the long division process, as well as explaining your answer written format.

$$\begin{array}{r}
 022.5 \\
 8 \overline{)1800} \\
 \underline{166} \phantom{0} \\
 140 \phantom{0} \\
 \underline{160} \phantom{0} \\
 40 \\
 \underline{40} \\
 0
 \end{array}$$

$$\begin{array}{r}
 32 \\
 \times 8 \\
 \hline
 256
 \end{array}$$

$$\begin{array}{r}
 00 \\
 \hline
 32 \overline{)180}
 \end{array}$$

$$\begin{array}{r}
 32 \\
 + 32 \\
 \hline
 64 \\
 32 \\
 \hline
 96 \\
 \times 32 \\
 \hline
 192 \\
 \times 32 \\
 \hline
 6144 \\
 + 32 \\
 \hline
 6176
 \end{array}$$

no it wont be long enough  
 So you have to multiply  $32 \times 8$  and  
 you would need 256 ~~hours~~ <sup>minets</sup> to finish  
 every single one

Task 3: Creating an Answer Key

One of the math teachers thinks it would be fun to have a math event at the field day. Students will be given a worksheet with division problems and possible answers. To win the competition, the group needs to find the mistakes that were made and prove it by solving it themselves with long division. You have been asked to make an answer key for this activity. Be sure to solve the problems using long division to prove that they are correct or incorrect.

1.  $21,156 \div 86 = 246$  True or False? Prove with long division.

$\begin{array}{r} 246 \\ 86 \overline{) 21156} \\ \underline{172} \phantom{0} \\ 395 \phantom{0} \\ \underline{344} \phantom{0} \\ 516 \\ \underline{516} \\ 0 \end{array}$	$\begin{array}{r} 26 \\ \times 2 \\ \hline 172 \\ + 86 \\ \hline 258 \\ + 86 \\ \hline 344 \end{array}$	$\begin{array}{r} 344 \\ + 172 \\ \hline 516 \end{array}$
---	---	---

If false, what is the correct answer? \_\_\_\_\_

2.  $196,466 \div 23 = 8,439$  True or False? Prove with long division.

$\begin{array}{r} 8542 \\ 23 \overline{) 196466} \\ \underline{184} \phantom{00} \\ 124 \phantom{00} \\ \underline{115} \phantom{00} \\ 96 \phantom{00} \\ \underline{92} \phantom{00} \\ 40 \phantom{00} \\ \underline{46} \\ 0 \end{array}$	$\begin{array}{r} 4 \\ \times 4 \\ \hline 16 \\ + 184 \\ \hline 196 \end{array}$	$\begin{array}{r} 42 \\ + 46 \\ \hline 88 \\ + 83 \\ \hline 171 \end{array}$
---	--	--

If false, what is the correct answer? 8542

3.  $78,934 \div 647 = 123$  True or False? Prove with long division.

$$\begin{array}{r}
 00 \overline{) 78934} \\
 \underline{647} \phantom{00} \\
 1423 \phantom{0} \\
 \underline{1294} \phantom{0} \\
 647294 \\
 + 6471294 \\
 \hline
 1294 \phantom{0}
 \end{array}$$

If false, what is the correct answer? 122
